Jun 11

Emergency Preparedness and Emerging Health Threats Meeting with NJDOH Commissioner Brown - June 2025

The New Jersey Healthcare Coalitions (NJHCC) are excited to welcome NJDOH Acting Commissioner Jeffrey Brown to speak with the NJHCC membership virtually.

Acting Commissioner Brown's Team has noted that this meeting, like previous meetings featuring NJDOH Staff, is intended to be a two-way conversation on relevant topics in our field. We encourage all NJHCC members to ask questions either during the registration process or during the June 11th meeting.

Please stay tuned as an agenda will be shared closer to the date of this meeting.

[Partner Event & Resource Amplification Request Form](#)

In an effort to amplify upcoming training opportunities, exercises, events, and resources the NJHCC EM Team is seeking to feature and publish partner facilitated/sponsored events. Please click the button below to access our amplification request form.

[Partner Event & Resource Amplification Request Form](#)

NJHCC & NJSP Training Request Form

The NJHCC EM Team has established a greater working relationship with the New Jersey State Police (NJSP) Training Unit. We are seeking to better understand what kinds of training you and your teams are looking for, examples include but are not limited to: ICS 100, 200, 300, 400, HSEEP, etc.

If there is sufficient interest (10~ responses) in a specific training or several trainings, the NJHCC EM Team will work with the NJSP Training Unit to attempt to establish a regional training opportunity with a closed registration for NJHCC members.

Please note: A training request cannot always be approved due to logistical, staffing, timing, etc. challenges on the part of the facilitating agencies. With that in mind, we will make every effort to get the training request approved and on the facilitated.

Why This Hurricane Season Has Experts on Edge (Scientific American)

June 1st marks the official start of the hurricane season in the Atlantic Ocean—and once again, the season looks like it will be busy. Though it is impossible to tell this far in advance exactly when storms will form and where they might hit, the presence of hurricane-friendly environmental conditions this season along with the [federal government cuts and policy chaos](#) have experts worried about the accuracy of forecasts and the resulting safety of communities. *Scientific American* asked several forecasters and hurricane researchers what they were most concerned about this year.

Seasonal forecasts—including the National Oceanic and Atmospheric Administration’s [put the odds in favor of having more storms than average this season, which will last until November 30](#). NOAA predicts 13 to 19 named storms, meaning those of tropical storm strength (with winds of 39 to 74 miles per hour) or higher. Of those, six to 10 are expected to become hurricanes (with winds of more than 74 mph). And among those hurricanes, three to five are expected to reach major hurricane status—meaning they will have winds that will fall within Category 3 (those of 111 to 129 mph) or a stronger category on the Saffir-Simpson scale.
